

AT63QTi AT OUTDOOR TOWER SPEAKERS

ALL TERRAIN, OUTDOOR TOWERS

(2) 6.5" (165mm) Aluminum Cone Woofers

(4) 1" (25 mm) Aluminum Dome Tweeters in Quad-Array

The new James Loudspeaker AT63QTi is a high-performance tower speaker designed to deliver concert-level performance outdoors. The AT63QTi is the smaller Outdoor Tower speaker in the series, features a titanium quad array tweeter and dual aluminum 6.5" woofers for wide dispersion and crisp fidelity. Their robust engineering and design allow the James Loudspeaker AT Outdoor Tower speakers to effortlessly deliver high SPL playback over extended periods of time.

Any AT Outdoor Tower speaker can be installed using our internal mount (a beautifully hidden mounting solution for permanent installation into hardscape), or external mount (a wider mounting plate, best suited for permanent landscape installations, or for moveable hardscape installations). For simplified installation and configuration, James Loudspeaker offers optional custom wiring harnesses. The speaker also has access through the front grille for easy in-field servicing.

Each AT Outdoor Tower may be ordered in low impedance or 70V configurations. Can be built to custom height, up to 96" (32" minimum). Available in 10 standard finishes or infinite custom finishes options.

Size	32 h x 10 w x 7.3 d (in) (elliptical) 813 h x 990 w x 185.4 d (mm) (Add 0.25in or 6.4mm to height for EM)
Freq Response	65Hz-24kHz \pm 3dB
Impedance	Woofer/Tweeter: 4 Ohm
Sensitivity	95dB 2.83V/1m
Power req.	Woofer/Tweeter: 100W-300W Woofer/Tweeter (70V): 100W
Woofer	(2) 6.5" (165 mm) Aluminum Cone
Tweeter	(4) 1" (25 mm) Aluminum Dome
Finishes	Marine Powder Coat

Mounting Options:

Internal Mount
(AT63QTi-IM)

External Mount
(AT63QTi-EM)
