

TX650Q TX SERIES

5 1/4" 3-WAY CEILING/SURROUND SPEAKER

Size	12.75 h x 12.75 w x 6.1 d (in) 324 h x 324 w x 155 d (mm) In-wall depth 6 d(in) 152(mm)
Weight	14 lbs. (6.4 kg)
Freq Response	45Hz-24kHz±3dB
Impedance	4 ohms
Sensitivity	91dB 2.83V /1m
Power req.	50-300W
Woofer	(2) 5.25" (133 mm) Aluminum
Mid	(2) 3.5" (89mm) Aluminum
Tweeter	(4) 0.75" (19 mm) Aluminum
Finishes	Gloss White
Mount	L-Brackets
PCB	TX650QPB

(2) 5 1/4" (133 mm) Aluminum Cone Woofers

(2) 3" (76 mm) High Excursion Midranges

(4) 0.75" (19mm) Aluminum Dome Quad-Array Tweeter

The TX650 introduces a new design concept to the James Loudspeaker lineup by offering a ceiling/in-wall solution for use in applications where coverage is a challenge. The TX650Q loudspeaker was developed to provide high performance at an off-axis seating position.

The TX650Q makes an outstanding ceiling speaker for both L/C/R and surround applications as well as a great in-wall surround speaker, allowing downward coverage to adhere to many 3D immersive specifications.

The TX650Q also provides an ideal solution for additional rooms where speakers must be located off of the main listening area.

The TX650Q is a full 3-way design in a FX style edge detail appearing virtually flush when installed. Utilizing four 0.75" aluminum dome tweeters, the James Quad Array Tweeter provides wide coverage and high output as well as timbre that matches James QX and QXC models. Along with the Quad Array Tweeter, dual 3" high excursions mid-range transducers are mounted on the main baffle. Dual 5.25" woofers provide an immersive full bass response.

All woofers are designed with aluminum cones, Santoprene™ surrounds and die cast baskets for strength, and sonic performance. All enclosures are constructed with aircraft 5052 aluminum and include aluminum grilles.

All units are assembled and tested in Minden, Nevada, and guaranteed to give you that signature James sound.
