The James Loudspeaker OT84-4 is a high-performance tower speaker designed to deliver concert-level performance outdoors. The OT84-4 is the medium sized Outdoor Tower speaker in the series, features an aluminum tweeter and an active passive 8" woofer pair rated to reach down to 35Hz. OT84-4's robust engineering and design allow the James Loudspeaker AT Outdoor Tower speakers to effortlessly deliver high SPL playback over extended periods of time.

Any AT Outdoor Tower speaker can be installed using our internal mount (a beautifully hidden mounting solution for permanent installation into hardscape), or external mount (a wider mounting plate, best suited for permanent landscape installations, or for moveable hardscape installations). For simplified installation and configuration, James Loudspeaker offers optional custom wiring harnesses. The speaker also has access through the front grille for easy in-field servicing.

Can be built to custom height, up to 96" (32" minimum). Available in 10 standard finishes or infinite custom finishes options.
